2 FEB 1970

MEMORANDUM FOR: Commanding Officer, First Strategic Aerospace Division  
Vandenberg Air Force Base, California

SUBJECT : Letter of Appreciation

1. In early December a group of five NPIC imagery interpreters spent two days at your installation familiarizing themselves with a number of your facilities. Our group received a complete and comprehensive tour of the United States' Western Missile Test Range including an inspection of missile launch and control facilities, missile handling facilities, and weapon storage facilities. Familiarization trips like this are of considerable importance in the development of imagery interpreters and, as such, are of considerable interest to me.

2. Our people have reported that the trip to Vandenberg was most worthwhile, citing the highly conscientious and professional efforts of your personnel responsible for making arrangements and presentations. Specifically cited was [redacted] the protocol officer.

STAT

3. Please pass along our thanks to [redacted] and all the people who helped make this trip a success. We appreciate your hospitality as well as your willingness to support us in this important aspect of our training program.
